

## **RNZAF General Attendee Information**

### **1. Designated area's on Base.**

#### **Jumpstart area**

The area in the immediate area of the PTSU hangar is where jumpstart attendees should remain for the entirety of their visit. RNZAF personnel should be approached if attendees need to move anywhere out side this area. The exception is when moving to or from your vehicle on entering or leaving base

#### **PTSU Hangar**

The PTSU Hangar will be used as the operational area. The loads will be formed up in the hangar and the Aircraft will be parked in front of the Hangar.

Tandem masters & camera flyers may pack in the PTSU hangar and use the large crew room and classroom. All other people need to keep clear of this area.

#### **ASC Hangar (main viewing area)**

The Long open hangar to the rear of the PTSU hangar will be used as a central viewing area. Anyone may use this area for socializing & packing. There will be a large tarpaulin on the hangar floor on which to pack.

#### **Base Alarm System**

In the event of a base call out or emergency a loud siren will alarm for one minute. All attendees should remain clear of roads and make their way to the area to the rear of the PTSU hangar. This action is mainly in order to keep roads clear for emergency vehicles. This is particularly relevant to the road immediately to the front of the viewing area as it is a main thoroughfare for the base fire appliances. At 1200h daily this alarm is tested for 5 seconds.

#### **Parking**

Tandem masters may park in the car park to the rear of the PTSU hangar. All other attendee's should park in the Large parking area marked on the base diagram. There will be guides in uniform to help you find the main parking area.
